Compare pdf documents

Choose 2 files you want to compare in left and right panes. Once PDF files are parsed, Compare button will be enabled. Click on it to check diff. By default PDF mode will be visible with deleted text highlighted in red color in left pane and inserted text highlighted in green color in right pane. Image mode converts each page into an image and compares them. File detail mode shows file metadata information like last modified date time, file size, number of pages, creator, PDF version etc. Once you choose your files, text content is extracted from each page. After extraction, only text content is compared in PDF mode. For the original file, deleted text is highlighted in red color annotation and for modified file, inserted text is highlighted with green color annotations. This is a web based tool, no software installation required. It works on any modern browser like Firefox, Chrome, Edge etc on Windows, Mac or Linux based computer. Mobile Browsers like on Android or iPhone might have some problems with touch issues. These tools can be standalone applications, web-based tools, or features within larger software suites. They are particularly useful in fields like legal, publishing, engineering, and any other field where PDF documents are frequently used. All file processing and comparison is done in your browser itself. No file information or data is sent to our servers. Where it doesn't work? Highlighted colors and text are not aligned correctly. Contact us with files/screenshots if they are off by large amount. It detect additions/removals at wrong places. Contact us with sample files. Can You Compare Word and PDF documents? No, both files must be PDF files. We have separate tool to compare word documents. You can always compare text content from pdf and word files manually by copy and pasting content. It supports most PDF versions based on Adobe format. Does this PDF Compare software check for graphical content too? Yes, sort of. Image mode converts each page to an image and then compares them. Right now, PDF mode only compares text content. It doesn't detect any text from my pdf file. This may be because your pdf has text as an image. You can use Image mode to compare the images. Otherwise, you'll need to use OCR software to extract text content in that case. How Can I share the diff result? You can export PDF files and share files directly. Insertions/Deletions are added as green/red annotations which can viewed in any PDF viewer that supports annotations. Image diff can also be exported. What about Privacy of my documents ? All the extraction and comparison happens on your browser itself. No data is saved on our server unless you explicitly choose to save for select time period. After that time period, all data is automatically deleted from our database. You data will only be visible to people who have your unique URL. Getting files from Drive Getting files from Dropbox Uploading file 0 of 0 Time left - seconds - Upload speed - MB/S Recognising text... Woops! Something is wrong with your Internet connection... Compare two PDF documents side by side and instantly spot differences. Perfect for comparing contracts, legal documents, and files. Our free & secure PDF comparison tool makes it easy to identify changes between PDF files. Draftable is a tool that helps you to compare any two texts or documents online. It highlights (redlines) all differences between the two files so you can find changes quickly. Click here to see a sample comparison. Using our online diff checker software, you can compare any two PDF files, Word documents, Excel spreadsheets, P files and PowerPoint presentations. You can even compare a PDF file with a Word document, side-by-side. Draftable will redline all deletions and highlight all new changes. Absolutely! Draftable's Online Tool includes a new feature to compare two free text entries online. This is ideal for quick documents comparisons without needing to sign up. Compare to online widget Draftable's comparison software offers enhanced security and functionality over online services. By processing documents locally, it ensures sensitive information remains private and secure. Additionally, its intuitive interface supports a wide range of file formats, providing a comprehensive and user-friendly comparison experience. Try online text diff checker here Draftable offers enterprise-grade solutions as well as a free online comparison tool. We have three options: Online tool. A free, web-based comparison tool that requires no signup. Perfect for quick Word, PDF, and other files comparisons on the go. Desktop Version. After a free trial, licenses can be purchased for teams. Learn more here. The desktop software is available in two versions: Draftable (best for large organisations) and Draftable Legal (best for law firms and legal teams). Enterprise solutions. This includes on-premise options such as desktop software and a diff checker REST API, providing robust privacy and customisation. Read more here. Contact us here. Broader file compatibility. Draftable has a broader file compatibility than Word Compare, supporting a wide range of file formats for comparison. Both Draftable and Draftable Legal can handle Word documents, PDFs (including scanned documents), PowerPoint presentations, and Excel spreadsheets, without the need to convert them into Word format first. Greater accuracy. If you're using Draftable Legal, you'll get greater accuracy over Word Compare, by detecting changes at a more detailed character level in addition to word-level changes. Unlike MS Word, it also identifies text that has been moved and edited. Greater workflow efficiency. You'll also get greater workflow efficiency when using Draftable Legal over Word Compare. Draftable Legal integrates seamlessly with essential software such as Word, Outlook, and Document Management Systems. These integrations reduce the number of clicks required to run a comparison. It speeds up subsequent tasks, like sending comparison results from Draftable with a single click. Read more about the differences between Draftable and MS Word Compare here. Redline comparison tools display the differences between Word, PDF, PPT or text documents with distinct formatting and colours for deleted, inserted and moved text, so you can easily identify changes within a single document view. Draftable offers different types of redline text comparison output including: Word Redline with or without tracked changes PDF Redline including changed pages only Redline in Excel Redline in PowerPoint Draftable offers document comparison software for large companies. It is designed to help you find small differences and highlight key changes quickly, in a side-by-side viewer. Other benefits include: Cost savings. Draftable shortens the process of finding changes down to just seconds, reducing the cost burden to your business. Time savings. Get your day back – stop comparing documents manually. Reduce embarrassing errors. Draftable helps your team stay on top of changes and look great in front of clients and colleagues. You don't need a Microsoft 365 subscription to use Draftable Online or API. When using Draftable Desktop, you can compare text, Word, PowerPoint and Excel documents using Office 2007 or later (including 365 and non-365 versions). To use the 'Export to Track Changes' feature on Draftable Desktop, you will need Office 2013 Pro Plus or later (including Office 365). See the full list of system requirements for Draftable Desktop here and for Draftable Legal here. Upload your Word files into the launcher, click Compare, and see the differences highlighted. Read more here. Draftable can detect changes in document content, fonts (family size and colour), styling (e.g. bold, italics), and layout (alignment, indentation). It can also find differences in complex elements like tables, text boxes, hidden text, footnotes, and endnotes. Draftable takes security seriously. We specialise in document comparison for large organisations and can cater to teams who have obligations concerning privacy and security. We will gladly work with your IT or Dev teams to get you up and running quickly. To discuss our self-hosted version or API, Contact Us. Read More About Security.
