

I'm not a bot

We believe that we have a moral imperative to always be advancing humankind. We believe it is possible to change the arc of humanity and we intend to. We align with those that are on a mission to improve the world. We strive for such things and will contribute all we can in the roles, ways and companies that have the most impact. Contribution demands execution and MX chooses to have a strong bias towards execution. We know that we cannot contribute and have impact at scale if we do not have a culture of clear individual, team and organizational accountability. Pangea temporary hotfixes here Precision. Performance. Mastery. Introducing The Master Series by Logitech, a range of products that unleash your capability to create, make, and do. Master your next project with tools that transform the way you work – from revolutionizing your creative process to helping you focus and get in your flow. Enhance your productivity with Smart Backlighting, MagSpeed scrolling, ergonomic designs, track-on-glass sensors, USB-C quick charging, easy switch for up to 3 devices, multi-OS compatibility, multi-device flow, meet and stream in sharp 4k. Create with intuitive controls, recommended profiles, and countless app-specific actions on the Logi Options+ AppRequires Logi Options+ app available on Windows and macOS at logitech.com/optionsplus.. Unleash your potential with a combination of MX solutions that work best for you. Whether you're dedicated to building your most productive setup, are a creative professional, are always on the go, or are mindful of your physical wellbeing. If you can think it, you can master it. Whether you're a creative or a coder, Logitech MX has crafted a solution designed to bring your projects and ideas to life and let you take control of your workflow. Introducing a partnership empowering creators, makers and doers to explore their full capability. Learn how MX and Adobe can unlock true creative flow, and claim an Adobe® Creative Cloud® subscription - on us. Partnering to inspire the builders of tomorrow, MX Series and Codecademy give you the tools needed to build, scale, and code to your fullest potential. Learn essential coding, programming, and AI skills to reimagine the future of tech with one free month of Codecademy Pro. Logitech MX is committed to spotlighting and supporting impactful initiatives and individuals that are disrupting the industry worldwide, to inspire girls and women to pursue a career or continue thriving in STEM. With #WomenWhoMaster, our mission is to ignite an industry-wide movement that addresses the gender gap and unequal access to opportunities in tech and IT, once and for all. 'Mx.' is a gender-neutral honorific for those who don't wish to be identified by gender. Though the earliest print evidence dates to 1977, the word has only recently become popular. Pronounced to sound like mix or mux, the title Mx. (which, like other honorifics, is styled without the period in British English) is used increasingly on various official forms in the UK, including driver's licenses and banking documents.Although the earliest print evidence of Mx. is from a 1977 issue of an American magazine called Single Parent, the title has not seen much official or published use in the US. It did, however, appear twice recently in The New York Times: a June 4th article noted Mx. as someone's preferred honorific, and a June 5th article all about Mx. made it clear that the June 4th use was an exception. The title simply isn't familiar enough to the newspaper's readers to be fully adopted.It's not clear whether or when Mx. will catch on in the US. The timeline for such developments can be long, as the title Ms. taught us not all that long ago. Coined in 1901, the now-commonplace Ms. wasn't fully adopted by The New York Times until 1986. Mx. seems to be moving more rapidly—it was added to Merriam-Webster Unabridged in April 2016. Words We're Watching talks about words we are increasingly seeing in use but that have not yet met our criteria for entry. MX helps companies do more with financial data that empowers consumers to reach their financial goals. We power actionable financial data intelligence to increase engagement and loyalty, acquire more customers, and identify growth opportunities. From securely verifying data to enhancing it with the most robust data engine, no one does data like MX. MX Bikes is a realistic motocross simulator, based on a scratch built physics engine that accurately simulates motorcycle dynamics and setup options. MX Bikes also allows to host and join online races, with an integrated matchmaking server. During events data is collected, to provide statistics for riders' comparison. Features: - automotive industry-standard tyre model - chassis flex simulation - dynamic terrain deformation - wet terrain simulation and wet weather - a plugins interface allows external programs to receive realtime data from the simulated bike - LAN and online racing. Dedicated server available - possibility to paint bike, helmet, kit, boots and gloves - tools and documentation are provided to allow advanced users to build and integrate new tracks, bikes, helmets, protections and more - Native Oculus Rift and SteamVR (HTC Vive, Valve Index) support. - FreeTrack support - EDTracker support If you are interested in MX Bikes, you can download the demo. The project is constantly evolving, so join the community to orient future development.
