Explore our latest gallery of Editors' Picks. Browse Editors' Favorites Experience AI-Powered Creativity No se debe cometer, bajo ningún concepto, el error de menospreciar ninguno de los dos valores de presión arterial, ya que tanto la presión arterial sistólica como la diastólica son sumamente importantes para analizar la actividad cardíaca y prevenir accidentes cerebrovasculares y otro tipo de padecimientos. De hecho, la presión sistólica (la más alta) suele cobrar una mayor importancia en los pacientes que superan los 50 años de edad, ya que puede darse el fenómeno de hipertensión sistólica que, a pesar de ser un padecimiento definido como hipertensión, este no afecta en nada la medición de la presión diastólica, ya que esta se mantiene entre sus rangos normales de 70-80 mm Hg, siendo bastante común en personas de la tercera edad. Asimismo, no basta simplemente con medir la presión arterial, ya que algunos factores externos como el nerviosismo pueden afectar los resultados arrojados. Por ello, es normal que los médicos especialistas midan hasta tres o más veces la presión arterial en los dos brazos del paciente para asegurarse de que los datos obtenidos son fiel reflejo de lo que está ocurriendo en sus arterias. En el caso de notar alguna anomalía, también es frecuente que el cardiólogo le indique al paciente medirse la presión arterial en casa, en una especie de monitoreo que detecte los pequeños cambios que pueda tener la presión arterial del paciente dependiendo de las actividades que esté realizando en su rutina. Luego, en el caso de que se confirme la presencia de un problema, lo normal es que el médico te someta a un electrocardiograma o a un monitoreo holter para revisar minuciosamente la actividad eléctrica de tu corazón para poder indicar el tratamiento más oportuno. En el cuerpo humano existe un tipo de fuerza que se aplica en la sangre con la intención de movilizarla, apartarla o comprimirla hacia los órganos del cuerpo para que estos trabajen como debe ser. Esta fuerza lleva el nombre de presión arterial y es un tipo de fuerza que al no ser controlada puede causar muchos estragos en el organismo. Este tipo de presión ejercida en la sangre puede causar que los niveles en las arterias suban o bajen y como resultado puede lograr que surjan alteraciones que pueden complicar la salud de un individuo, por esta razón es sumamente importante mantenerla en un nivel natural. La presión arterial es una fuerza que se ejerce en la sangre para que esta pueda recorrer todos los torrentes sanguíneos y así aportarle la vitalidad necesaria a los órganos, de esta manera esta presión le cede el oxígeno y los nutrientes a los órganos para que estos funcionen de la mejor manera. La presión sanguíneos y los nutrientes a los órganos para que estos funcionen de la mejor manera. del individuo. Características de la presión arterial La presión arterial es una de las fuerzas más importantes que se encuentran en el cuerpo humano, ya que es aquella que permite el movimiento de la sangre en los órganos, venas y arterias. Esta fuerza cuenta con algunas características importantes, estas son las siguientes: La presión arterial varía en las personas a lo largo de veinticuatro horas, en ella influyen factores como el ejercicio, el café, el tabaco y el dolor. La presión arterial es la causante de muchas enfermedades de tensión se mide con aparatos de gas y con aparatos comunes que utilizan un esfigmomanómetro o también se pueden realizar con los aparatos tecnológicos que resultan ser portátiles. La presión arterial es aquella fuerza que se ejerce en la sangre para que esta pueda movilizarse por el cuerpo, este tipo de presión puede aumentar o disminuir. Por esta razón es necesario mantener la presión en un estado natural para que esta no cause estragos en el organismo. La presión arterial se mide en distintos valores que indican son 119/79 o menos. Cuando los valores indican una presión de 140/90 esta quiere decir que la persona presenta una hipertensión arterial. La presión arterial tiende a cambiar constantemente, por esta razón es importante tomar las precauciones para mantenerla en su ritmo normal. COMPARTIR ENFacebookTwitterPin ItWhatsApp Se puede decir que la tensión arterial considerada ideal es de 119/79 mm/Hg, pero lo cierto es que la tensión arterial normal tiene un rango más amplio que este. Se trata de hipertensión arterial cuando la tensión es superior a 140/90 mm/Hg, o 140 mm/Hg de presión diastólica. Por el contrario, se habla de hipotensión arterial si la tensión es inferior a 100/60 mm/Hg, es decir, 100 mm/Hg de presión sistólica y 60 mm/Hg de presión diastólica. Tomarnos la tensión o medir nuestra presión arterial es un acto rutinario que debemos llevar a cabo para comprobar que no sufrimos ningún problema de salud relacionado con una tensión arterial descompensada, como pueden ser la hipertensión arterial (tensión arterial es un acto rutinario que debemos llevar a cabo para comprobar que no sufrimos ningún problema de salud relacionado con una tensión arterial descompensada, como pueden ser la hipertensión arterial (tensión arterial es un acto rutinario que debemos llevar a cabo para comprobar que no sufrimos ningún problema de salud relacionado con una tensión arterial descompensada, como pueden ser la hipertensión arterial (tensión arterial es un fundamental saber cómo se toma la tensión, pero también es necesario entender los resultados de esta medición. En este artículo de unCOMO, te explicamos con detalle cuáles son los valores normales de tensión arterial. Índice Para poder saber el valor de la presión arterial normal hay que tener en cuenta que son muchos los factores que influyen en cada persona como, por ejemplo, el sexo, la edad, los hábitos, la alimentación, etc. Además, también hay que tener en cuenta otras variables como el esfuerzo, la digestión, las emociones, los excitantes, o el sueño, entre otros factores. Por todas estas circunstancias, junto con muchas otras, los números tienen un relativa fiabilidad y deben acompañarse con el estudio de todos los factores que intervengan. Aun así, se han establecido unos valores. Te los mostramos a continuación: Primer número: se indicará en la columna de mercurio en el esfigmomanómetro, señalando la presión máxima de la sangre en la relajación máxima del ventrículo.En la mayoría de países, la tensión se expresa en milímetros de mercurio, aunque en el mundo hispánico se suele indicar en centímetros. De forma que aquí hablaríamos, por ejemplo, de una tensión de 12 y 8, mientras que en otras partes se diría 120 y 80. Este valor indica que nuestra tensión es capaz de hacer subir 12 cm la columna de mercurio. Los considerados como valores normales de la presión sanguínea son los siguientes: La presión diastólica entre 6 y 9 cm de Hg (60 y 90 mm)Por tanto, tienes una presión arterial normal si te encuentras dentro de dichos valores. Lo más recomendable es tener una presión sistólica que no supere los 12 cm (máximo 13), y la diastólica por debajo de los 9 cm de Hg. Cabe destacar que con la edad la tensión atterial son, por lo tanto, algo más elevados que durante la edad adulta.La hipertensión o tensión altase da en valores superiores a 14 y 9, mientras que los valores por debajo de 10 y 6 indican hipotensión o tensión baja. Si tienes tendencia a tener la tensión alta, o tienes antecedentes familiares, te recomendamos que leas este otro artículo para que sepas cuáles son los síntomas de la tensión baja. Tal como hemos comentado en el apartado anterior, los valores normales de tensión suelen variar según la edad y el sexo, por lo que es conveniente conocer cuáles son las cifras de cada caso en concreto. Toma nota:16 a 18 añosPresión sistólica: 105 - 135 (hombre) / 100 - 130 (mujer)Presión diastólica: 60 - 86 (hombre) / 60 - 85 (mujer)19 a 24 añosPresión sistólica: 105 - 139 (hombre) / 102 - 135 (mujer)Presión diastólica: 65 - 89 (hombre) / 102 - 135 (mujer)25 - 29 añosPresión sistólica: 105 - 139 (hombre) / 105 - 139 (mujer)Presión diastólica: 68 - 92 (hombre) / 65 - 89 (mujer)40 - 49 añosPresión sistólica: 110 - 150 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 96 (hombre) / 105 - 150 (mujer)50 - 59 añosPresión sistólica: 115 - 155 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 98 (mujer)60 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 160 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 98 (mujer)60 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 160 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 98 (mujer)60 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 160 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 98 (mujer)60 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más
añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombre) / 105 - 150 (mujer)80 o más añosPresión sistólica: 115 - 160 (hombr 115 - 160 (mujer)Presión diastólica: 70 - 100 (hombre) / 70 - 100 (mujer)Toda esta información hace referencia a la presión arterial normal de una persona de la franja de edad mencionada. En caso de que no se cumplan estos rangos, lo mejor es consultar con un médico para seguir el mejor tratamiento en cada caso. Actualmente, el aparato más usado para tomar la tensión es el llamado esfigmomanómetro, compuesto por una bolsa y una perilla de goma conectada por un tubo a la columna de mercurio que registra en centímetros la presión. Se trata de una medición muy sencilla que no supone ningún tipo de dolor y se realiza muy rápidamente. En este artículo de unCOMO podrás ver los pasos de Cómo se toma la tensión. La presión arterial es la fuerza con la que la sangre viaja por nuestro cuerpo. Por ello, es importante mantener unos valores adecuados para garantizar al máximo la salud cardíaca. La tensión arterial alta es un padecimiento muy común que pone en riesgo la salud del corazón, haciéndolo más propenso a sufrir enfermedades cardíacas. Llevar una dieta adecuada y tomar la medicación indicada por un especialista, es fundamental para mejorar este cuadro clínico. En este artículo 5 recetas para bajar la presión alta te damos soluciones alimenticias para combatir este problema. Por su parte, la tensión arterial baja puede ocasionar problemas circulatorios, mareos frecuentes y pérdida de la consciencia. Tener clara la forma de actuar ante una bajada de tensión y cuidar la alimentación es prioritario para garantizar nuestro bienestar. Este artículo es meramente informativo, en unCOMO no tenemos facultad para recetar ningún tratamiento médico en el caso de presentar cualquier tipo de condición o malestar. An 1835 illustration of power loom weaving, as part of the Industrial Revolution Millennia 2nd millennia 2nd 19th century 20th century 20th century 19th century 20th century Decades 1800s 1810s 1820s 1830s 1840s 1850s 1860s 1870s 1880s 1890s Categories: Births - Deaths Establishments vte The 19th century began on 1 January 1801 (represented by the Roman numerals MDCCCI), and ended on 31 December 1900 (MCM). It was the 9th century of the 2nd millennium. It was characterized by vast social upheaval. Slavery was abolished in much of Europe and the Americas. The First Industrial Revolution, though it began in the late 18th century, expanded beyond its British homeland for the first industrial Revolution, though it began in the late 18th century, expanded beyond its British homeland for the first industrial Revolution. societies of the Low Countries, France, the Rhineland, Northern Italy, and the Northeastern United States. A few decades later, the Second Industrial Revolution led to ever more massive urbanization and much higher levels of productivity, profit, and prosperity, a pattern that continued into the 20th century. The Catholic Church, in response to the growing influence and power of modernism, secularism and materialism, formed the First Vatican Council in the late 19th century to deal with such problems and confirm certain Catholic doctrines as dogma. Religious missionaries were sent from the Americas and Europe to Asia, Africa and the Middle East. In the Middle East, it was an era of change and reform. The Islamic gunpowder empires fell into decline and European imperialism brought much of South Asia, and almost all of Africa under colonial rule. Reformers were opposed at every turn by conservatives who strove to maintain the centuries-old Islamic laws and social order.[1] The 19th century also saw the collapse of the large Spanish, Portuguese, French and Mughal empires, which paved the way for the growing influence of the British, French, German, Russian, Austro-Hungarian, Italian, and Japanese empires along with the United States. Following the defeat of France in the Napoleonic Wars, it marked the end of France's status as the world superpower. Britain took France's status as the world superpower, the British and Russian empires expanded considerably, becoming two of the world's leading powers. Russia expanded its territory to the Caucasus and Central Asia. The Ottoman Empire underwent a period of Westernization and reform known as the Tanzimat, vastly increasing its control over core territories in the Middle East. However, it remained in decline and became known as the sick man of Europe, losing territory in the Balkans and North Africa. The remaining powers in the Indian subcontinent, such as the Maratha and Sikh empires, suffered a massive decline, and their dissatisfaction with the British East India Company's rule led to the Indian Rebellion of 1857 and the company's dissolution. India was later ruled directly by the British Crown through the establishment of the British Raj. During the post-Napoleonic era (after 1815), Britain enforced what became known as the Pax Britannica, which ushered in unprecedented globalization on a massive scale. Britain's overseas possessions grew rapidly in the first half of the century, especially with the expansion of vast territories in Canada, Australia, India, and in the last two decades of the world's population. By the end of the century, Britain, France, Germany, and the United States had colonized almost all of Oceania. In East Asia, China under the Qing dynasty endured its century of humiliation by foreign powers that lasted until the first half of the 20th century. The last surviving man and woman, respectively, verified to have been born in the 19th century were Jiroemon Kimura (1897-2013) and Nabi Tajima (1900-2018), both Japanese. Official portrait of Queen Victoria, 1859 The first electronics appeared in the 19th century, with the introduction of the electric relay in 1837, the first functional light bulb in 1878.[3] The 19th century was an era of rapidly accelerating scientific discovery and invention, with significant developments in the fields of mathematics, physics, chemistry, biology, electricity, and metallurgy that laid the groundwork for the technological advances of the 20th century.[4] The Industrial Revolution began in Great Britain and spread to continental Europe, North America, and Japan.[5] The Victorian era was notorious for the employment of young children in factories and mines, as well as strict social norms regarding modesty and gender roles.[6] Japan embarked on a program of rapid modernization, before defeating China, under the Qing dynasty, in the First Sino-Japanese War. Advances in medicine and the understanding of human anatomy and disease prevention took place in the 19th century, and were partly responsible for rapidly accelerating population growth in the Western world. Europe's population doubled during the 19th century, from approximately 200 million.[7] The introduction of railroads provided the first major advancement in land transportation for centuries, changing the way people lived and obtained goods, and fuelling major urbanization movements in countries across the globe. Numerous cities worldwide surpassed populations of a million or more during this century. London became the world's largest city and capital of the British Empire. Its population increased from 1 million in 1800 to 6.7 million a century later. The last remaining undiscovered landmasses of Earth, including vast expanses of the Arctic and Antarctic, accurate and detailed maps of the globe were available by the 1890s.
Liberalism became the pre eminent reform movement in Europe.[8] Arab slave traders and their captives along the Ruvuma River, 19th century Slavery was greatly reduced around the world. Following a successful slave revolt in Haiti, Britain and France stepped up the battle against the Barbary pirates and succeeded in stopping their enslavement of Europeans. The UK's Slavery Abolition Act 1833 charged the British Royal Navy with ending the global slavery was the British, who did so in 1834. America's Thirteenth Amendment following their Civil War abolished slavery was the British, who did so in 1834. The 19th century was remarkable in the widespread formation of new settlement foundations which were particularly prevalent across North America and Australia, with a significant proportion of the two continents' largest cities being founded at some point in the century. Chicago in the United States and Melbourne in Australia were non-existent in the earliest decades but grew to become the 2nd largest cities in the United States and British Empire respectively by the end of the century. In the 19th century, approximately 70 million people left Europe, with most migrating to the United States.[10] The 19th century also saw the rapid creation, development, and codification of many sports, particularly in Britain and the United States. Association football, rugby union, baseball, and many other sports were developed during the sports were developed during this empire facilitated the rapid spread of sports such as cricket to many different parts of the world. Also, women's fashion was a very sensitive topic during this empire facilitated the rapid spread of sports such as cricket to many different parts of the world. time, as women showing their ankles was viewed to be scandalous. The boundaries set by the Congress of Vienna, 1815 It also marks the fall of the Second Russo-Turkish War, which in itself followed the great Crimean War. Map of the world from 1897. Napoleonic era. Napoleon's retreat from Russia in 1812. The war is turning decisively against the French Empire and its allies, led by Napoleon I, against a fluctuating array of European powers formed into various coalitions, financed and usually led by the United Kingdom. The wars stemmed from the unresolved disputes associated with the French Revolution, Napoleon Bonaparte gained power in France in 1799. In 1804, he crowned himself Emperor of the French Network victory over an Austrian-Russian army at the Battle of Austerlitz ended the War of the Third Coalition. As a result of the Treaty of Pressburg, the Holy Roman Empire was dissolved. Later efforts were less successful. In the Peninsular War, France unsuccessfully attempted to establish Joseph Bonaparte as King of Spain. In 1812, the French invasion of Russia had massive French casualties, and was a turning point in the Napoleonic Wars. Napoleon Bonaparte, Emperor of the First French EmpireIn 1814, after defeat in the War of the Sixth Coalition, Napoleon abdicated and was exiled to Elba. Later that year, he escaped exile and began the Hundred Days before finally being defeated at the Battle of Waterloo and exiled to Saint Helena, an island in the South Atlantic Ocean. After Napoleon's defeat, the Congress of Vienna was held to determine new national borders. The Concert of Europe attempted to preserve this settlement was established to preserve these borders. Independence, 18 February 1818 Mexico and the majority of the countries in Central America and South America obtained independence from France. In Mexico, the Mexican War of Independence was a decade-long conflict that ended in Mexican independence in 1821 Due to the Napoleonic Wars, the royal family of Portugal relocated to Brazil from 1808 to 1821, leading to Brazil having a separate monarchy from Portugal. The Federal Republic of Central America gained independence from Spain in 1821 and from Mexico in 1823. After several rebellions, by 1841 the federation had dissolved into the independent
countries of Guatemala, El Salvador, Honduras, Nicaragua, and Costa Rica.[11] In 1830, the post-colonial nation of Gran Colombia (including modern-day Panama), Ecuador, and Venezuela took its place. Main article: Revolutions of 1848. The end of the European revolutions of 1848. Revolutions of 1848 were a series of political upheavals throughout Europe in 1848. The revolutions were essentially democratic and liberal in nature, with the aim of removing the old monarchical structures and creating independent nation states. after a separate revolution began in France in February. Over 50 countries were affected, but with no coordination or cooperation among their respective revolutionaries. According to Evans and von Strandmann (2000), some of the major contributing factors were widespread dissatisfaction with political leadership, demands for more participation in government and democracy, demands for freedom of the press, other demands made by the working class, the upsurge of nationalism, and the regrouping of established government to abolish the slave trade. The abolitionism movement achieved success in the 19th century. The Atlantic slavery abolished in the United States in 1808, and by the end of the century, almost every government had banned slavery. The Slavery Abolition Act 1833 banned slavery throughout the British Empire, and the Lei Aurea abolished slavery in Brazil in 1888 Abolitionism in the United States continued until the end of the American Civil War. Frederick Douglass and Harriet Tubman were two of many American abolitionists who helped with a network of antislavery activists and safe houses known as the Underground Railroad. The American Civil War took place from 1861 to 1865. Eleven southern states seceded from the United States, largely over concerns related to slavery. In 1863, President Abraham Lincoln issued the Emancipation Proclamation. Lincoln issued a preliminary[13] on September 22, 1862, warning that in all states still in rebellion (Confederacy) on January 1, 1863, he would declare their slaves "then, thenceforward, and forever free."[14] He did so.[15] The Thirteenth Amendment to the Constitution,[16] ratified in 1865, officially abolished slavery in the entire country. Five days after Robert E. Lee surrendered at Appomattox Courthouse, Virginia, Lincoln was assassinated by actor and Confederate sympathizer John Wilkes Booth. Main article: Decline and modernization of the Egyptian-Ottoman Empire Ibrahim Pasha of Egypt, leader of the Egyptian-Ottoman Empire, and in 1867, it passed a constitution that defined its independence from the Ottoman Empire. In 1830, Greece became the first country to break away from the Ottoman Empire after the Greek War of Independence. In 1831, The First Egyptian-Ottoman War (1831-1833) occurred, between the Ottoman Empire and Egypt brought about by Muhammad Ali Pasha's demand to the Sublime Porte for control of Greater Syria, as reward for aiding the Russo-Turkish War, the Treaty of Berlin recognized the formal independence of the Serbia, Montenegro, and Romania. Bulgaria became autonomous. Main article: Taiping Rebellion A scene of the Taiping Rebellion The Taiping Rebellion The Taiping Rebellion A scene of the Serbia, Montenegro, and Romania. Bulgaria became autonomous. Main article: Taiping Rebellion A scene of the taiping Rebellion A scene of the Taiping Rebellion A scene o declared himself the younger brother of Jesus Christ and developed a new Chinese religion known as the God Worshipping Society. After proclaiming the establishment of the Taiping Heavenly Kingdom in 1851, the Taiping army conquered a large part of China, capturing Nanjing in 1853. In 1864, after the death of Hong Xiuquan, Qing forces recaptured Nanjing and ended the rebellion.[19] Main article: Meiji Restoration During the Edo period, Japan largely pursued an isolationist foreign policy. In 1853, United States Navy Commodore Matthew C. Perry threatened the Japanese capital Edo with gunships, demanding that they agree to open trade. and foreign countries, with the policy of Sakoku formally ended in 1854. By 1872, the Japanese government, closely following European and established a strong central government, closely following European models.[20] Main articles: Western imperialism in Asia and Scramble for Africa Arrival of Marshal Randon in Algeria in 1802. 1803: United States more than doubles in size when it buys out France's territorial claims in North America via the Louisiana Purchase. This begins the U.S.'s westward expansion to the Pacific, referred to as its Manifest Destiny, which involves annexed the Maratha Confederacy after the Third Anglo-Maratha War. 1823 - 1887: British Empire annexed Burma (now also called Myanmar) after three Anglo-Burmese Wars. 1848 - 1849: Sikh Empire is defeated in the Second Anglo-Sikh War. Therefore, the entire Indian subcontinent is under British control. 1862: France gained its first foothold in Southeast Asia and in 1863 annexed Cambodia. 1867: United States purchased Alaska from Russia. Comparison of Africa in the years 1880 and 1913 In Africa, European exploration of almost the entire continent by 1898. New medicines such as quinine and more advanced firearms allowed European nations to conquer native populations. [21] Motivations for the Scramble for Africa included national pride, desire for raw materials, and Christian missionary activity. Britain seized control of Egypt to ensure control of the Suez Canal, but Ethiopia defeated Italy in the First Italo-Ethiopian War at the Battle of Adwa. France, Belgium, Portugal, and Germany also had substantial colonies. The Berlin Conference of 1884-1885 attempted to reach agreement on colonial borders in Africa, but disputes continued, both amongst European powers and in resistance by the native populations.[21] In 1867, diamonds were discovered in Transvaal. This led to colonization in Southern Africa by the British and business interests, led by Cecil Rhodes.[21] 1801-1815: First Barbary War and the Second Barbary War between the United States and the Barbary States of North Africa. 1802: Tay Son army recaptured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Phu Xuan, causing Vo Tanh r, Treaty of Bucharest. 1807-1837: Musket Wars among Maori in many parts of New Zealand. 1808-1809: Russia conquers Finland from Sweden in the Finnish War.1816: Shaka rises to power over the Zulu Kingdom. Zulu expansion was a major factor of the Mfecane ("Crushing") that depopulated large areas of southern Africa. 1810: Grito de Dolores begins the Mexican War of Independence. 1811: Battle of Tippecanoe: U.S. outnumbering Native Americans resulting in defeat and burning of community 1812-1815: War of 1812 between the United States and Britain;
ends in a draw, except that Native Americans lose power. 1813-1837: Afghan-Sikh Wars. 1814-1816: Anglo-Nepalese War between Nepal (Gurkha Empire) and British Empire. 1817: First Seminole War begins in Florida. 1817: Russia commences its conquest of the Caucasus. 1820: Revolutions of 1820 in Southern Europe 1821-1830: Greek War of Independence against the Ottoman Empire. 1825-1830: Java War begins. 1826-1828: After the final Russo-Persian War, the Persian back territory lost to Russia from the previous war. 1828-1832: Black War in Tasmania leads to the near extinction of the Tasmanian aborigines 1830: July Revolution overthrew old line of Bourbons. 1830: November Uprising in Poland against Russia. 1830: Belgian Revolution results in Belgium's indep the Java War. The whole area of Yogyakarta and Surakarta and Permanently divide the kingdom of Mataram was signed by Sasradiningrat, Pepatih Dalem Surakarta and Permanently divide the kingdom of Mataram is a de facto and de yure controlled by the Dutch East Indies. 1831: France invades and occupies Algeria. 1831-1833: Egyptian-Ottoman War. 1832-1875: Regimental rebellions of Brazil 1835-1836: Texas Revolution results in Texas's independence from Mexico. 1839-1842: First Opium War begins. 1846-1848: Mexican-American War leads to Mexico's cession of much of the modern-day Southwestern United States. 1848: February Revolution overthrew Louis Philippe's government. Second Republic proclaimed; Louis Napoleon, nephew of Napoleon, nep Rebellion against the Company Raj. After this the power of the East India Company is transferred to the British Crown. 1859: Franco-Austrian War is part of the wars of Italian unification. 1861–1865: American Civil War between the Union and seceding Confederace. Dead Confederace Soldiers. In the American Civil War, 30% of all Southern white males aged 18-40 were killed.[22] 1861-1867: French intervention in Mexico and the creation of the Second Mexican Empire, ruled by Maximilian I of Mexico. 1863-1865: January Uprising against the Russian Empire. 1864-1870: Paraguayan War ends Paraguayan War population. 1866: Austro-Prussian War results in the dissolution of the German Confederation and the creation of the shogunate and the founding the Japanese Empire. 1868-1878: Ten Years' War between Cuba and Spain. 1870-1871: Franco-Prussian War results in the unifications of Germany and Italy, the collapse of the Second French Empire. 1879: Anglo-Zulu War results in British victory and the annexation of the Zulu Kingdom. 1879-1880: Little War against Spanish rule in Cuba leads to rebel defeat. 1879-1883: Chile battles with Peru and Bolivia over Andean territory in the War of the Pacific. 1880-1881: First Boer War begins. 1881-1899: Mahdist War in Sudan. A depiction of the Battle of Omdurman, 1898. During the battle, Winston Churchill took part in a cavalry charge. 1882: Anglo-Egyptian War British invasion and subsequent occupation of Egypt 1883-1898: Mandingo people led by Samory Touré. 1894-1895: After the First Sino-Japanese War, China cedes Taiwan to Japan and grants Japan a free hand in Korea. 1895-1896: Ethiopia defeats Italo-Ethiopia defeats Italo-Ethiopia defeats Italo-Ethiopia War at the Battle of Adwa. 1895-1898: Cuban War for Independence results in Cuban independence from Spain. 1896-1898: Philippine Revolution results in a Filipino victory. 1898: Spanish-American War results in the independence of Cuba. 1899-1901: Boxer Rebellion in China is suppressed by the Eight-Nation Alliance. 1899-1902: Thousand Days' War in Colombia breaks out between the "Liberales" and "Conservadores", culminating with the loss of Panama in 1903. 1899-1902: Second Boer War begins. 1899-1902: Philippine-American War begins. Distinguished Men of Science. [23] Use the cursor to see who is who. [24] Main article: 19th century in science as a profession; the term scientist was coined in 1833 by William Whewell, [25] which soon replaced the older term of natural philosopher. Among the most influential ideas of the 19th century were those of Charles Darwin (alongside the independent researches of Alfred Russel Wallace), who in 1859 published the book The Origin of Species, which introduced the idea of evolution by natural selection. Another important landmark in medicine and biology were the successful efforts to prove the germ theory of disease. Following this, Louis Pasteur made the first vaccine against rabies, and also made many discoveries in the field of chemistry, including the atomic theory of John Dalton, created the first vaccine against rabies, and also made many discoveries of Michael Faraday, André-Marie Ampère, James Clerk Maxwell, and their contemporaries led to the creation of electromagnetism as a new branch of science. Thermodynamics led to an understanding of heat and the notion of energy was defined. chemistry - and of new kinds of radiation. In astronomy, the planet Neptune was discovered. In mathematics, the notion of complex numbers finally matured and led to a subsequent analytical theory; they also began the use of hypercomplex numbers. Karl Weierstrass and others carried out the arithmetization of analysis for functions of real and complex variables. It also saw rise to new progress in geometry beyond those classical theories of Euclid, after a similarly long period of stagnation. But the most important step in science at this time were the ideas formulated by the creators of electrical science. Their work changed the face of physics and made possible for new technology to come about including a rapid spread in the use of electric illumination at the end of the 1890s. Michael Faraday (1791-1867) Charles Darwin (1809-1882) 1807: Potassium and Sodium are individually isolated by Sir Humphry Davy. 1831-1836: Charles Darwin's journey on HMS Beagle. 1859: Charles Darwin publishes On Physical Lines of Force, formulating the four Maxwell's equations. 1865: Gregor Mendel formulates his laws of inheritance. 1869: Dmitri Mendeleev creates the Periodic table. 1873: Maxwell's A Treatise on Electricity and Magnetism published. 1877: Asaph Hall discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons of Mars 1896: Henri Becquerel discovers the moons
of Mars 1896: Henri Becquerel discovers the moons of M estimated 25% of the adult population of Europe. [26] 1804: Morphine first isolated. 1842: Anesthesia used for the first time. 1847: Chloroform invented for the first successful vaccine against rabies for a young boy who had been bitten 14 times by a rabid dog. 1889: Aspirin patented. Thomas Edison was an American inventor, scientist, and businessman who developed many devices that greatly influenced life around the world, including the motion picture camera, phonograph and long-lasting, practical electric light bulb. Built for the Netphener bus company in 1895, the Benz Omnibus was the first motor bus in history. 1804: First steam locomotive begins operation. 1816: Laufmaschine invented by Karl von Drais. 1825: Erie Canal opened connecting the Great Lakes to the Atlantic Ocean. 1825: First isolation of aluminium. 1827: First photograph taken (technique of heliography) by Joseph Nicephore Niepce. 1825: The Stockton and Darlington Railway, the first public railway in the world, is opened. 1826: Samuel Morey patented. 1841: The world "dinosaur" is coined by Richard Owen. 1844: First publicly funded telegraph line in the world between Baltimore and Washington-sends demonstration message on 24 May, ushering in the age of the telegraph. This message read "What hath God wrought?" (Bible, Numbers 23:23) 1849: The safety pin and the gas mask are invented. 1852: The first successful blimp is invented 1855: Bessemer process enables steel to be mass-produced. 1856: World's first oil refinery in Romania 1858: Invention of the phonautograph, the first true device for recording sound. 1859: The first ironclad was launched into sea by the French Navy. 1860: Benjamin Tyler Henry invents the 16-shot Henry Rifle 1861: Richard Gatling invents the Gatling Gun, first modern machine gun used notably in the battles of Cold Harbor and Petersburg 1862: First meeting in combat of ironclad warships, USS Monitor and CSS Virginia, during the American Civil War. 1868: Safety bicycle invented. 1869: First transcontinental railroad completed in United States on 10 May. 1870: Rasmus Malling-Hansen's invention the Hansen Writing Ball becomes the first commercial telephone exchange in New Haven, Connecticut. c. 1875/1880: Introduction of the widespread use of electric lighting. These included early crude systems by 1880.[27] 1879: Thomas Edison Holborn Viaduct (London) and Pearl Street (New York) power stations supplying indoor electric lighting using Edison's incandescent bulb.[28][29] 1884: Sir Hiram Maxim invents the first self-powered Machine gun, the Maxim gun. 1885: Singer begins production of the 'Vibrating Shuttle'. which would become the most popular model of sewing machine. 1886 Karl Benz sells the first commercial automobile. 1890: The cardboard box is invented. 1892: John Froelich develops and constructs the first gasoline/petrol-powered tractor. 1894: Karl Elsener invents the Swiss Army knife. 1894: Hist gasoline/petrol-powered tractor. death in 1877. 1818: The first permanent Reform Judaism congregation, the Neuer Israelitischer Tempel, is founded in Hamburg on October 18. Around the same time, through the development of Wissenschaft des Judentums, the seeds of Conservative Judaism are sown. 1830: The Church of Jesus Christ of Latter Day Saints is established. 1844: The Báb announces his revelation on 23 May, founding Bábism. He announced to the world of the coming of "He whom God shall make manifest". He is considered the forerunner of Bahá'u'lláh, the founder of the Bahá'í Faith. 1850s-1890s: In Islam, Salafism grows in popularity. 1851: Hong Xiuquan, the leader of the God Worshipping Society, founds the Taiping Heavenly Kingdom. 1857: In Paris, France, Allan Kardec, publishes The Spiritism. 1868: In Japan, State Shinto is established amidst the Meiji Restoration. 1869-1870: The First Vatican Council is convened, articulating the dogma of papal infallibility and promoting a revival of scholastic theology. 1871-1878: In Germany, Otto von Bismarck challenges the Catholic Church in the Kulturkampf ("Culture War") 1875: Helena Blavatsky co-founds the Theosophical Society and becomes the leading articulator of Theosophy. 1879: Mary Baker Eddy founds the Sudan, Muhammad Ahmad claims to be the Mahdi, founding the Mahdist State and declaring war on the Khedivate of Egypt. 1889: Mirza Ghulam Ahmad establishes the papal encyclical Rerum novarum, the first major document informing modern Catholic social teaching. The Great Exhibition in London. Starting during the 18th century, the UK was the first country in the world to industrialize. 1808: Beethoven composes his Fifth Symphony 1813: Jane Austen publishes Frankenstein; or, The Modern Prometheus. 1819: John Keats writes his six of his best-known odes. 1819: Théodore Géricault paints his masterpiece The Raft of the Medusa, and exhibits it in the French Salon of 1819 at the Louvre. 1824: Premiere of Beethoven's Ninth Symphony. 1829: Johann Wolfgang von Goethe's Faust premieres. 1833-1834: Thomas Carlyle publishes Self-Reliance, 1845: Frederick Douglass publishes Narrative of the Life of Frederick Douglass, an American Slave, 1847: The Bronte sisters publish The Communist Manifesto, 1849: Josiah Henson publishes The Life of Josiah Henson, Formerly a Slave, Now an Inhabitant of Canada, as Narrated by Himself. 1851: Herman Melville publishes Uncle Tom's Cabin. 1855: Walt Whitman publishes the first edition of My Bondage and Canada, as Narrated by Himself. 1851: Herman Melville publishes the first edition of My Bondage and My Freedom. 1862: Victor Hugo publishes Les Misérables. 1863: Jules Verne begins publishing his collection of stories and novels, Voyages extraordinaires, with the novel Cinq semaines en ballon. 1865: Lewis Carroll publishes Alice's Adventures in Wonderland. 1869: Leo Tolstoy publishes War and Peace Auguste Renoir, Bal du moulin de la Galette, 1876, Musée d'Orsay 1875: Georges Bizet's opera Carmen premiers in Paris. 1876: Richard Wagner's Ring Cycle is first performed in its entirety. 1883: Robert Louis Stevenson's Treasure Island is published. 1884: Mark Twain publishes the Adventures of Huckleberry Finn. 1886: Strange Case of Dr Jekyll and Mr Hyde by Robert Louis Stevenson is published. 1887: Sir Arthur Conan Doyle publishes his first Sherlock Holmes story, A Study in Scarlet. 1889: Vincent van Gogh paints The Starry Night. 1889: Moulin Rouge opens in Paris. 1892: Tchaikovsky's Nutcracker Suite premières in St Petersburg. 1894: Rudyard Kipling's The Jungle Book is published 1895: Trial of Oscar Wilde and première of his play The Importance of Being Earnest. 1897: Bram Stoker writes Dracula. 1900: L. Frank Baum publishes The Wonderful Wizard of Oz. Main articles: Romantic poetry and 19th century in literature Russian writer Leo Tolstoy, author of War and Peace and Anna Karenina On the literary front the new century opens with romanticism, a movement that spread throughout Europe in reaction to 18th-century rationalism, and it develops more or less along the lines of the new school in England, while in the continent the German Sturm und Drang spreads its influence as far as Italy and Spain. French arts had been hampered by the Napoleonic Wars but subsequently developed rapidly. Modernism began [30] The Goncourts and Émile Zola in France and Giovanni Verga in Italy produce some of the finest naturalist novels. Italian naturalist novels are especially important in that they give a social map of the new unified Italy to a people that until then had been scarcely aware of its ethnic and cultural diversity. There was a huge literary output during the 19th century. Some of the most famous writers included the Russians Alexander Pushkin, Nikolai Gogol, Leo Tolstoy, Anton Chekhov and Fyodor Dostoyevsky; the English Charles Dickens, John Keats, Alfred, Lord Tennyson and Jane Austen; the Scottish Sir Walter Scott, Thomas Carlyle and Arthur Conan Doyle (creator of the character Sherlock Holmes); the Irish Oscar Wilde; the Americans Edgar Allan Poe, Ralph Waldo Emerson, and Mark Twain; and the French Victor Hugo, Honoré de Balzac, Jules Verne, Alexandre Dumas and Charles Baudelaire.[31] Some American literary writers, poets and novelists were: Walt Whitman, Mark Twain, Harriet Ann Jacobs, Nathaniel Hawthorne, Ralph Waldo Emerson, Herman Melville, Frederick Douglass, Harriet Beecher Stowe, Joel Chandler Harris, and Emily Dickinson to name a few. Conversely, the adherents of continuity, who viewed with alarm the dismantling of the Islamic order and sought to preserve tradition and retain the values and ideals that had served Ottomar and Islamic society so well for so long, are sometimes portraved as nothing but archaic reactionaries. But we should avoid these simplistic characterizations if we are to appreciate the agonizing and dangerous process of transforming an established religious, social and political worldview. from the original on 2015-10-22. Conoce cuáles son los valores de la presión arterial normal, alta y baja para poder medir y cuidar tu salud cardiovascular. Según la que la sangre viaja por tu cuerpo, y es fundamental mantener unos valores adecuados para tener una correcta salud cardiovascular. Según la enciclopedia médica Medline Plus, la presión arterial normal es importante para un flujo sanguíneo adecuado a los órganos y tejidos corporales. Frecuencia cardíaca normal: ¿cuántas veces debe latir tu corazón por minuto?Depende de muchos factores, como la cantidad de sangre que esté bombeando el corazón o el diámetro de las arterias. La presión suele ser más alta cuando se bombea más sangre y el diámetro arterial es reducido.La presión sanguínea se mide tanto en el que los ventrículos del corazón se relaja, la diástole. Presión arterial normal, baja y altaEste gráfico de la Asociación Estadounidense del Corazón te servirá para recordar los niveles de presión sanguínea. Asociación Estadounidense del CorazónLos valores de presión arterial normal se sitúa en 120 sobre 80. La presión diastólica es de 80. La presión arterial alta se considera una lectura constante de 140 sobre 90, que a largo plazo podría dañar órganos importantes, como el cerebro y los riñones, contribuir al riesgo de enfermedades cardiacas, e insuficiencia cardiaca, e insuficiencia renal.La presión arterial baja es aguella presión arterial inferior a 90 sobre 60, caracterizada por la visión borrosa, los desmayos, la fatiga, la dificultad de concentración o los mareos y aturdimiento. Las caídas repentinas y graves de la presión arterial o bajones de tensión privan al organismo de oxígeno, lo que puede dañar órganos. Presión arterial normal según tu edad y sexoLa presión arterial cambia con la edad. Según los National Institutes of Health estadounidenses, la probabilidad de tener presión arterial alta o hipertensión aumenta con la edad, especialmente la hipertensión sistólica aislada. Antes de los 55 años, los hombres tienen una mayor probabilidad de tener presión arterial alta, mientras que las mujeres son más propensas a tenerla después de la menopausia. A continuación puedes consultar los rangos más habituales.16 a 18 añosPresión sistólica: 105 - 135 (hombre) / 100 - 130 (mujer)Presión diastólica: 60 - 86 (hombre) / 100 - 130 (mujer)Presión diastólica: 60 - 86 (hombre) / 100 - 130 (mujer)Presión diastólica: 60 - 86 (hombre) / 102 - 135 (mujer)Presión diastólica: 60 - 86 (hombre) / 102 - 135 (mujer)Presión diastólica: 60 - 86 (hombre) / 100 - 130 (mujer)Presión diastólica: 60 - 86 (hombre) diastólica: 65 - 89 (hombre) / 65 - 89 (hombre) / 65 - 89 (mujer)30 - 39 añosPresión sistólica: 110 - 145 (hombre) / 105 - 150 (mujer)Presión diastólica: 70 - 96 (hombre) / 65 - 96 (mujer)30 - 59 añosPresión sistólica: 115 - 155 (hombre) / 110 - 155 (mujer)Presión diastólica: 70 - 98 (hombre) / 70 - 98 (mujer)60 años o másPresión sistólica: 115 - 160 (hombre) / 70 - 100 (mujer)Presión diastólica: 70 - 100 (mujer)Conoce cómo trabajamos en BusinessInsider.
