Some PDFs are encrypted with a password, but most methods assume you know the password to the encrypted PDF. Here are two ways to remove a password from a PDF with built-in tools or third-party software. Use Save as PDF or Print to PDF. Your system will create a duplicate copy of the PDF, and that duplicate copy of the PDF. won't have a password. This trick will only work if the PDF doesn't have any printing restrictions. However, many PDF files are just password-protected to provide the password. You can do it right through your browser. First, open the PDF document and provide the password it requires. Click the Print button (it might be an icon of a printer) on the PDF toolbar while viewing the password-protected document. Click the drop-down menu that lets you pick your printer, then select "Save as PDF". Click the "Save" button, and you'll be prompted to provide a name and location for your new PDF. Your new PDF will contain the same content as the original PDF, but won't be password-protected. If you don't have a Save to PDF "instead. You can use this trick in any PDF viewer on Windows 10 or Windows 11. Just select "Microsoft Print to PDF" as the printer. On older versions of Windows, you need to install a third-party PDF printer, however. The Save as PDF method also works on other operating systems, too. For example, on a Mac, you can do this with Preview, or any other PDF viewer. First, open the protected document in Preview and provide the password it requires. Click File > Print to open the print dialog, or press Command+P. Click the "PDF" menu button at the bottom of the print dialog and select "Save as PDF". Enter a file name and location for your new PDF file will have the same contents as the original, but no password. You can also do this the official way with Adobe Acrobat Pro, a paid application. This is a different program from the free Adobe Acrobat Reader PDF viewer that most people have. Adobe offers a week-long free trial of Acrobat Pro will work even if the PDF has printing restrictions, and can't be printed in other applications using the above trick. Open the PDF file in Adobe Acrobat Pro and provide its password to view it. Click "Menu" in the upper-left corner, go all the way down to "Protection," then select "Security "tab to get to the same options. Click the "Security Method" box, select "No Security", and click "OK" to remove the password. You can then go to Menu > Save to commit the changes, or you can just try to close Acrobat Proit'll force you to confirm that you want to save the changes you made before it allows you to exist aren't legal in most jurisdictions if you don't own the PDF.
