This browser-based tool is called SmallJPG and it helps users increase the size of their images in kilobytes to specific sizes like 50kb, 100kb, or 200kb. It's useful for people who need to upload pictures for job applications or school admissions where there are usually restrictions on photo size uploads. You can process multiple photos at once, making it a convenient tool for batch processing. To use SmallJPG, you simply need to upload your image, select the desired file size, and then click "Resize JPG" to increase the image size. The resized image can be downloaded directly from the website. It also supports various image formats like JPG, JPEG, PNG, and BMP. One of the key features of SmallJPG is its ability to maintain image quality even when enlarging the size. It uses modern compression algorithms to ensure that the images are not compromised in terms of quality. The tool is completely free to use and supports batch processing, making it an ideal solution for users who need to resize multiple images quickly and efficiently. SmallJPG also offers customizable settings, allowing you to manually set the size of the image you want to increase. This makes it a versatile tool that can be used in various situations where specific image sizes are required. Overall, SmallJPG is a reliable and user-friendly solution for anyone who needs to resize their images to meet specific requirements. SmallJPG offers a reliable solution for users struggling with image size limitations during essential application submissions. By utilizing SmallJPG, users can efficiently increase image sizes to meet specific requirements, saving time and effort. To begin, upload your desired image, which supports various formats such as JPG, JPEG, PNG, and PDF. Preview the image and adjust settings, including cropping, rotating, or flipping, before proceeding with compression. Once processed, download your resized image, ensuring that it meets the required 100KB size while maintaining quality. SmallJPG prioritizes user privacy, storing images locally on their device without transmitting them to external servers. The tool is completely free and does not require login credentials, eliminating hidden fees or premium features locked behind paywalls. It supports file size units such as KB, MB, or Bytes, providing fast processing times of just seconds.
