Ge 6 device universal remote codes roku

You got a GE Universal Remote and a snazzy Roku, but now you're stuck figuring out those pesky codes? It's like searching for a needle in a haystack! But don't worry, I've got your back with the right codes to conquer your Roku with your trusty GE Universal Remote. No more fumbling around with multiple remotes or playing hide-and-seek with the correct codes - we're in smooth sailing territory now! The GE Universal Remote is super handy for controlling multiple devices with just one remote and saving space and time by keeping your remote collection to a minimum. Its user-friendly design makes it easy to set up and use, plus it's designed to be comfy to hold so you and your family can binge-watch your favorite shows without getting hand cramps from an awkward remote. The GE Universal Remote is especially awesome for Roku users - with just a few simple steps, you can set up this remote to control your Roku devices. For compatibility, use CL4 or CL5 GE remotes, as the older CL3 versions don't work with Roku devices. Upgrading to the CL5 version is affordable and costs less than \$15. Here are some 4-digit codes for your Roku TV system: and some 3-digit codes for Roku: The GE Universal Remote is also compatible with other brands like Sharp, TCL, ONN, Emerson, Westinghouse, Philips, RCA, JVC, and more, making it a versatile addition to your entertainment setup. Now that you've got a new GE universal remote, let's pair it with your Roku device. We're gonna walk you through different methods to get your remote and Roku working together seamlessly. This method is quite simple - just follow these steps: 1. Turn on your Roku device. 2. Press and hold the Setup button on your remote until the indicator light starts blinking. 3. Enter the Roku code (you can find the codes here, such as 6171, 2013, or 0903). 4. The indicator light will blink twice to confirm the code. 5. Test the remote now by pressing the Power button to see if your Roku device responds. If the code search doesn't do the trick, try this manual method instead: 1. Turn on your Roku device. 2. Press and hold the Setup button on your remote until the indicator light starts blinking. 3. Enter 9-9-1. 4. The light should blink twice. 5. Aim the remote at your Roku device and tap the Power button slowly until the device turns off. 6. Press Setup to lock in the code, and you're good to go. Still no luck? Give the auto search method a shot: 1. Turn on your Roku device. 2. Press and hold the Setup button on your remote until the indicator light starts blinking. 3. Enter 9-9-2. 4. The light should blink twice. 5. Aim the remote at your Roku device and press the Power button. Keep in mind that these methods might take some trial and error, but with a little patience, you'll get it sorted out! Using the Power button as the remote scans through codes is the key to successfully turning off your Roku device. Release the button when it turns off. If other methods don't work, try using the learning mode feature on your GE universal remote. This lets the remote learn commands directly from your original Roku remote. To do this, place both remotes head-to-head and press and hold the Setup button until the light starts blinking. Enter 9-7-5, and the light should blink twice. Choose a button you want to teach (e.g., Power) and press it on your original Roku remote. The GE remote's light will blink twice when it learns the command. Repeat this for all necessary buttons. Roku devices have different GE universal remote codes. For example: - Streaming devices like Roku Stick or Box need 4355, 7317, 2014, 6001, 6171, 2013, or 0903. - Roku TVs from brands like Hisense, TCL, Philips, and others require CL3 Codes: * New models use 2891, 1741 * Models after 2013 need 4395, 4355 * Older models (2011-2012) use 7317 * Mixed codes for new models are 6171, 6251, 6001, 6381, 2891, 1741, 5931. For quick setup on your GE Universal Remote with your Roku device: turn it on and press the "Setup" button until the light blinks twice. Enter a remote code from the list above and test if it works by trying to control your Roku device. If not, try another code and repeat the process. Some specific brand codes for TV's include: - TCL uses 2169, 3877, 6173, or 3184 - Hisense requires 10748, 11314, 11660, or 12183 - Sharp needs 10093, 10165, 10386, or 11602 - ONN uses 12402, 12272, 12269, or 11963 - Philips and Vizio can use codes like 11454. 10017, 13565 for Vizio: 11758, 13758, 12757, 13415. Follow steps: Press "Power" button after entering code. Codes: - JVC: 11601, 21164, 15679, 19303 - Sany: 10154, 10036, 10180, 12269 - Emerson: 10154, 10178, 11394, 11661 - Westinghouse: 11712, 13908, 12784, 12293 - Insignia: 12049, 12751, 11810, 12184 - LG: 11758, 10017, 10814, 12844 - Samsung: 12051, 12280, 10482, 10060 - Panasonic: 10250, 11291, 10051, 12264 Find remote version by looking at white sticker in battery compartment. The GE universal remote offers a variety of features designed to simplify using a Roku device. The remote includes buttons for accessing the channel list, controlling closed captions, and adjusting volume, as well as playback control and an input selector. If unsure about a button's function or need clarification on using specific functions, the user manual is available for reference. For those experiencing issues with the remote responding to codes, double-checking the code entry is essential, followed by power cycling the Roku device if necessary. Additionally, user manuals are recommended for optimal use and troubleshooting guidance. In case of a faulty remote, replacements can be found through online retailers or electronic stores at an affordable price point. Regular batteries should also be installed while replacing the remote. Furthermore, GE offers customer support for resolving issues with the universal remote codes. Other options to consider include Philips universal remotes, known for their ease of setup and programming, as well as Logitech Harmony remotes, which offer advanced features such as touch screens and customization options. RCA universal remotes also provide an affordable option for controlling multiple devices simultaneously. For those seeking a remote specifically designed for Roku, the official Roku universal remotes are available, providing expert control over various devices. Use the following 4-digit codes to program your GE universal remote to control your Roku TV: 7317, 2014, 6001, 6171, 2013, or 0903. For Sharp, TCL, ONN, Emerson, Westinghouse, Philips, RCA, JVC, Sanyo, and Hisense brands, use codes 6001, 6251, or 6171. If your GE remote is not working with your Roku device, try another code until you find one that works. Only GE remote models CL4 and CL5 are compatible with Roku. To set up your universal remote to control your Roku TV, follow these steps: Turn on your Roku TV, press the Setup button until the indicator light blinks twice, enter the 4-digit code for your Roku TV (such as 6001 or 6171), test the remote by pressing its Power button, and try another code if it doesn't work. Finding the right Roku remote code can be a bit of trial and error. Consider trying common codes: 7317, 2014, 6001, 6171, 2013, 0903, or 6251. You can also refer to your universal remote manufacturer's manual or website for specific codes. If you need assistance, contact Roku's customer support. To program a GE universal remote for your Vizio TV or other devices, follow these steps: 1. First, make sure you have a compatible code from the list provided. 2. Press and hold the setup button on the remote until the small light blinks four times. 3. Choose a code from the list and enter it into the remote. 4. The button light will turn off once you get the correct code; if not, try another code. Additionally, some Roku TVs come with universal remote controls that can be used to power other devices beyond just the TV. To check if your remote is universal, look for "Set" and "Mode" options on the control panel. For programming purposes, GE offers a range of universal remote codes for different brands and types of devices, including: * Samsung: 0105, 0077, 0009, etc. * Vizio: 1758, 1292, 0178, etc. * JVC: 065, 067, 055, etc. * Emerson TV: 01, 32, 34, etc. * Hisense: 0073, 0182, 0145, etc. You can find more universal remote codes for various brands by checking out other categories or searching online. GE Universal Remote Manual: A comprehensive guide on how to program a GE 6 device universal remote without codes. The manual provides instructions for auto-code search, which allows the remote to automatically find compatible codes for your devices. Follow these step-by-step guidelines: 1. Enter Setup Mode: Press and hold the SETUP key until the red light blinks. 2. Select Device Type: Release the SETUP button and press the device type button (e.g., TV, DVD player). 3. Start Code Search: Aim the remote at the device, then press and release the POWER key. 4. Test Codes: The remote will send 10 universal codes. If the device turns off, proceed to step 5. Otherwise, repeat step 3 to test the next 10 codes. 5. Review Individual Codes: Press and release the VOLUME button to resend the first code. If the device turns off, you've found a working code! Save it by pressing the same device key again. 6. Test Results: Aim the remote at the device and test the keys to ensure they operate as expected. If not, return to step 1 and use the next code. Remember to take a 3-second pause after each VOLUME button press for the device to respond. If you have multiple remotes for your TV, DVD player, and cable box, consider getting a GE Universal remote to simplify things. However, this remote will not work straight out of the box - you'll need to program it using specific codes for each device. Below is a comprehensive list of working GE universal remote codes for various brands. Each code corresponds to a particular brand or model, and programming your remote is relatively quick, taking no more than two minutes. Here's the code list: **TV Brand Codes** * LG: 0001, 5511, 3001, ... * Philips: 0181, 6221, 5741, ... * GE: 4921, 0141, 0191, ... * And many more brands... **Note:** The codes are organized by brand and model type (e.g., CL3, CL4/CL5, etc.). This list is meant to help you find the correct code for your device and program your GE Universal remote accordingly. If you're trying to program your GE universal remote but don't have a code, there are a few ways to do it. One method involves using the auto-code search feature, where you hold down the setup button until the TV Switch light stays on, select the device type, and repeatedly press the power button until the device turns off. Another method involves programming the remote by long-pressing the setup button until a red light appears, pressing the TV button once, and then pressing the power button every 5 seconds. Continue this process until the TV turns itself off. Once you've completed either of these methods, try using functions like volume and channel change to test your GE universal remote. If you're still having trouble finding the code for your specific device or brand, provide the name of your TV brand, and we'll do our best to find it for you. Keep in mind that listing all codes on one page is not feasible due to the sheer number of devices and brands out there. However, this list includes some of the most commonly requested codes, so hopefully, it will help you get started. Code that works with your TV might be effective for some but not others. If you're having issues, a simple reset of the remote using the programming method could resolve the problem.
