It's usually created by the community and requires installation steps to activate its features.Is it safe to install MODs on my Android/iOS/PC?While MODs can enhance your experience, they might come with risks. Only download from trusted sources to minimize the chance of malware or compatibility issues. Make sure to follow installation instructions carefully.How can I install a MOD on my device?Installing a MOD involves specific steps depending on your device. Generally, you'd need to download the MOD file, enable installation from unknown sources (if applicable), and follow instructions provided by the MOD creator.Will using a MOD affect my device's warranty or game/account bans?Yes, using MODs can violate terms of service, risking bans or voiding warranties. It's essential to use caution and check the rules of the game, app, or software. Some MODs might be considered cheating and result in penalties.What should I do if a MOD isn't working as expected?If a MOD isn't functioning correctly, double-check that you followed installation instructions accurately. Check if the MOD is compatible with your device's version. If issues persist, reach out to the MOD's creator or the community for troubleshooting help. Apr 29, 2025 Version 2.6.2 Off-Road car added.Bug fixes. The game is has been very nice to play plus on top of that I've been playing the game since it ever been out, and over time I'm starting to see a lot of newer players use gg more then usual and that's causing other players to lag out of the servers and also kick none gg players out of the entire game and that's not good at all because these are players that want to get into the game but can't enjoy it due to the cause of players using gg cars and stressing the servers out and also I think that the game has a lot more potential it's just that I think that what needs to be done is getting a patch to where u can't glitch using gg at all and also start to ban players that want to use hacks for speed and using neons plus everything else that's not right because it's actually ruining the game for others and I think that you guys needa put ur foot down and fix the problem before the game starts to lose loyal players bc the game wants to kick others out the game or lobby bc of gg players but yk ik it's not that easy it just needs to seriously be done soon bc it's really a good game and I would hate to see that the game is down like it is still when a lot of players like myself who spent real life money on this game and have it all wasted Your suggestions are highly appreciated! We will forward them to the developer team and hopefully can feature them in the future updates. This review is just giving you some tips on certain cars that y'all should add and I'm not saying I'm not happy with the current cars by the way because I do like the current cars I am just giving you a few tips on cars you should add. The first one is the 1989 Ford Mustang fox body LX or GT. I feel like you guys should add that because I feel like it would be a great experience driving around a old loud classical Mustang And also, I feel like many people would also like this. The second car that I would recommend adding is the 2024 Ford Mustang dark horse. I think you should add that because it just brings a little bit more Mustangs to the game and I feel like people would like driving in a newer ride for people who like newer cars more then classic cars. and now the last one I recommend adding is the 1965 Shelby cobra. I would really recommend adding this because this is a little bit of a smaller and lighter car and it really gives you that old-school vibe and the sound is incredible. Same thing with the look. now these are just to bring a little bit more old-school style to your game. In general, I really love your game though. I've been playing it for about two years I think and I can't stop. keep up the good work guys! :) I sent them a review via email. It is a bit long I hope you read it I appreciate your dedication for entertaining us. I await your response in future updates or via email and very hard the CPM community. My name is Gilberto Moran and my nickname in the game is uncle.g before .7tr3s. I would really appreciate your attention in this game basically since they came out for iOS and I love the social dynamics they have created in this world of race games especially that provides a feeling of driving and creativity for cars, very good and necessary since the time of Need for Speed Underground and several successors that emerged later. I hope you do not drop it. In fact the new update is divine I congratulate you, beautiful detail about the vehicles and styles of Ken Block. It seems to me that its approach is not to emulate any other existing game and in the same way to incorporate weapons or farms or anything similar and that is the most I like. Just enjoy the automobile experience and its ramifications. This is why I take the opportunity to suggest some things again and point out others for the improvement from my point of view in the multi player mode and the condition and dynamics of all vehicles in general. The developer, Aidana Kengbeiil, indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy. The following data may be collected but it is not linked to your identity: Privacy practices may vary, for example, based on the features you use or your age. Learn More AN1.com Games Simulations Car Parking Multiplayer (MOD, Unlimited Money) - an innovative take on the popular parking genre. The gameplay is based on two different mechanics, so you have to complete various tasks, as in the classic representatives of the genre. At the same time, the game has a completely open world with freedom of movement, and in addition you can appreciate a full-fledged multiplayer with hundreds of real players. Licensed vehicles can be upgraded and customized so you can create in Car Parking Multiplayer mod apk unique designs. After releasing a new version of the MOD on our website, download the new APK and install it over the previous version without uninstalling it, it will only update to the new version, and your progress will be saved!
