How to install Duplex IPTV, windows version of Duplex IPTV is available in the Official Microst Windows Store Category: Entertainment Link to app in Microsoft Windows Store: Duplex IPTV Download and install LDPlayer on your computerLocate the Play Store in LDPlayer's system apps, launch it, and sign in to your Google accountEnter "Duplex IPTV" into the search bar and search for itChoose and install Duplex IPTV from the search resultsOnce the download and installation are complete, return to the LDPlayer home screenClick on the game icon on the LDPlayer home screen to start enjoying the exciting game YOU CAN SEE THE INSTRUCTIONS TO PAY FOR THE APP ON YOUR TV OR BY FOLLOWING THIS TUTORIALHow do I activate the Duplex iptv app?The order and payment of your activation code can be made on the following link:One-year DuplexPlay activation code Please note: The Duplex iptv app on the Microsoft Store or Google Store can be used to activate the app for any device, including Smart TV. Computer or Mobile Phone.1 – Download Duplex IPTV on any Android device from the officialGoogle Play Store 2 – Open the downloaded Duplex IPTV app ona Windows orAndroid device (not on your Smart TV)3 – On the home screen, open [Activation]3 – Choose "Renew for another device"4 – Enter the device ID and device key of your TV5 – Enter your previously ordered activation code and validate.6 – Congratulations, you have activated the Duplex play application, go to the Add DuplexPlay playlist site to insert your subscription link, restart the application on your TV and your iptv subscription will work immediately. The XBOX One version of Duplex IPTV is available in the Official Microst Windows Store Category: Entertainment Link to app in Microsoft Windows Store: Duplex IPTV DuplexPlay is a media player from CRTVAPPS. This multimedia app lets you watch videos on your Android devices, including your phones, tablets, and smart TVs. It allows users to create and customize a playlist of their favorite videos, which can play in the order they choose and it even allows them to watch IPTV content. Note, however, that the app is only a media player. It does not include any content, so you have to upload your playlist How do you use the app?DuplexPlay lets users play videos grouped into a playlist. It allows the creation and even customization for quick access to your media content. The app comes with various helpful tools, including resume playback, which allows you to pick up where you left off every time or go to a specific position using the time slider. More than that, the app supports embedded playlists and even a selection of audio tracks to find the setup that suits you. DuplexPlay does not have any content, and you need to add them manually. On the home screen, select the Add Playlist button. The app will then provide instructions and information, such as the URL, where you can manage your playlists, the device ID, and the device key. On your web browser, visit the provided URL and supply the information required. Click Manage Playlists and then the Add Playlist button to start creating your playlist. A popup will open asking for playlist information. Fill this up, and then click Save. From there, you can start adding video playlists, then refreshing the app so it can update its playlist. One important note is that DuplexPlay is not a free app, although you will have a free trial for seven days. After which, you need to pay a small amount to activate the app. Not only that but if you are using it to play your IPTV channels, you need to have a separate subscription for that as well. Is the app worth it?DuplexPlay is a media player that comes with advanced features. With it, you can enjoy some features to make your streaming experience more fun. However, there are drawbacks to the app that can be a deal-breaker for some. Creating the playlists alone takes time. Not only that but activating the app needs payment. So if you are using it to play IPTV channels, you will have to pay for two subscriptions. Duflix is an advanced and versatile IPTV (Internet Protocol Television) Player application Designed for users who wish to enjoy a seamless streaming experience of m3u lists and user-uploaded content. This innovative player transcends traditional viewing boundaries, offering a comprehensive solution for all your IPTV needs. In case you can't find it in your country, switch your tv to USA or UK store and install it The android version of Duplex IPTV is available in the Official Google Play Store Category: Entertainment Link to app in Google Play Store: Duplex IPTV How to connect IPTV via a set-top boxLet's start with how to connect IPTV to the TV using a digital tuner. Described sequence is suitable for any model. The physical connection of the IPTV box is done with the TV off. Plug an HDMI cable into the appropriate connectors on the set-top box and the TV. If you connect via RCA cord, connect it to the AV output and the "tulip" to the TV.Plug an Ethernet patch cord into one of the router's LAN ports on the receiver unit.Connect the power supply.Press the "Setup" button on the remote control to open the tuner interface.3 Go to "Advanced Settings" and set the Internet and video playback parameters.Separately you need to download VLC Media Player, m3u-playlist of TV channels, dump these files to a flash drive.Then go to the "USB" menu and run the installation file of the player from the flash drive.Once installed, open the player and click "Add Playlist" and "Select File". Find the file on the flash drive, click "Ok". Channels are displayed in a common list. Click the channel icon to start playing. How to connect IPTV via a routerThe second way to use IPTV on TV with "smart" function is to connect TV directly to the router. We'll show you two ways: via internet cable and Wi-Fi. Let's start with a wired connection.Connect one end of the LAN cord to the panel port, the other end to the router port highlighted in the settings.In the "Quick Settings" menu, select "Network" and go to "Wired Connection".Click the "Change" button and check the "Automatic" box.Click on "Connect. The router will send local network information to the TV, and the connection will be established automatically. You do not need to enter anything manually. Wireless connection is made in the menu section "Connect to Wi-Fi network". Available lines are displayed in a list. Select your local line, enter the password, click "Connect". The connection to the Internet is established. Detail Light and easy to operate application.NOTE: the Application does not contain any streaming, it is just a media player.For more information contact us. Samsung Tizen 2017,2018,2019 and 2020 Duplex IPTV is available in the Official Samsung App Store (All countries) Category: Videos Please note that: the app is available in All countries. If you can't find it in your store, switch your tv to USA and install it. Samsung Tizen 2015 and 2016 Duplex IPTV is available in the Official Samsung App Store (All countries) Category: Videos Please note that: the app is available in All countries. If you can't find it in your store, switch your tv to USA and install it. Samsung Orsay 2014 Not supported yet Internet Protocol, or IP, is a general protocol that provides a data transmission mechanism for controlling the flow of packets between devices connected to the Internet. It is also the standard method for formatting data packets over a large network such as the Internet. A packet, which is defined as a collection of information, can be sent in a well-defined format over an IP network. In an IPTV system, the video signal will be split into multiple IP packets and then the packets will be sent over the IP network. Internet Protocol is widely used in various networks such as LAN, wireless Wi-Fi and telephony networks. Packet forwarding is a process in which a packet of information is sent to a user through an IP network. There are three different processes for sending packets: unicast, multicast, and broadcast. Unicast is a type of transmission in which one sender and one receiver communicate with each other over the network. Thus, a packet of information is sent from one sender to only one receiver involving only two nodes. In IPTV technology, VOD (video on demand) is a prime example of unicast where the user can stop, pause and play the video content. Multicast: Information can be sent from a single source to a selected group of recipients. A multicast process is usually used to establish a connection between one sender and several receivers. These form one data packets to a group of devices at the same time. In IPTV, each broadcast TV channel must have a single IP multicast network group in order to send data packets to a selected group of receivers. This means that hundreds of viewers will be able to watch a single TV broadcast simultaneously. Broadcast packets will be sent to a group of clients, and clients can include a broadcast stream route on their network device. Using multicast is much more efficient when the same packet of information is sent to many users at the same time. Multicast is more difficult to implement than unicast because it requires more effort to add and remove users from multicast groups. In unicast, three streams from the same source are sent to three different recipients, but in multicast, only one stream is sent to the recipient group. No Duplex IPTV is a media player. It doesn't include and it will never include any content of any type Do you sell IPTV playlists or IPTV subscriptions. No. We don't sell playlists nor IPTV subscriptions. Please don't contact us about IPTV subscriptions! Do you have other websites or IPTV servers? No. The official website of Duplex IPTV is www.duplexiptv.com Any other websites claim to be the official Duplex IPTV websites are fake websites and we don't own them! Do you have Youtube or Facebook or other social accounts? No. not yet. Any social account claim to be the official Duplex IPTV accounts are fake accounts and we don't own them! What are the supported platforms? Duplex IPTV is available for the following platforms? LG webOS (All countries) Samsung Tizen 2015 and above (All countries) Android (All countries) Amazon Fire TV (All countries) Windows PC (All countries) XBOX One (All countries) How to add/edit playlists? Duplex IPTV is a media player and it doesn't include any content. Please follow these steps to add your playlists: On home screen, select "Add Playlist" The app will show instructions which include the following information: URL to manage playlists: Edit.DuplexIPTV.com Device ID and Device Key to be used to identify the TV Please write down the values as you will use them in next steps Open a browser on your computer and visit Edit.DuplexIPTV.com Supply Device ID and Device Key in corresponding fields Click on "Manage Playlists" to start manage playlists Click on "Add Playlist". A popup will open asking for Playlist information Fill the information and then click save Return back to your TV. On Home Screen press Blue key to refresh playlists Enjoy How to remove unwanted protected playlist? If you have a playlist that is protected by a PIN and want to delete it Open Duplex IPTV on your device Open Settings Open Security Settings Write down this PIN as you will use it in next steps Go to our website Edit.Duplexiptv.com and login using your device ID and Key Select the playlist you want to delete and then press the delete button If the playlist is protected, use the PIN you got in previous step to remove the protected playlist How PIN can't be used to edit or view protected playlists. It only can be used to remove playlists How to protect my playlist? You can protect your playlists in the following ways: When you enter a playlist, put a PIN on the playlist. This way no one can view or modify it. Please remember the PIN as for security reasons it can't be recovered. You can also lock the whole device to prevent anyone from adding or removing playlists without your permission Open Duplex IPTV app Open Settings Open Security Settings Turn on [Lock Playlists] Please remember the Unlock the playlists when you are going to modify the playlists. How much the cost of Duplex IPTV? Unfortunately, due to the continous increase of the cost required to support new customers we have to switch Duplex IPTV to be paid with a very small fee Currently, Duplex IPTV is free to try for 7 days. After this period you are welcome to pay a small amount to support the app Six months activation cost only $0.99 One year activation cost only $1.99 How to renew activations? IMPORTANT: before purchasing an activation for the app, remember that Duplex IPTV is a media player and it doesn't include playlists and we don't sell playlists. If you don't have playlists, please don't purchase the activation of the app. The payments can be done using one of the following methods: Please note that: Duplex IPTV app on Microsoft Store or Google store can be used to pay for any device including Smart TVs. Steps to renew for your Smart TVs Steps to renew for your Windows, XBOX One, Android TV or Android device Open Duplex IPTV app on the selected platform On home screen open [Activation] Choose [Renew for this device] Choose an activation type and then confirm purchase How to check my activation status? You can view the activation of the app by using the app itself. On the home screen there is an [Activation] button that will show the status and the expiration of the app. Login to our website Edit.Duplexiptv.com using the device ID and device Key and review the activation status and also review the payments you did. Is activation per device? Yes, activations is per device. If you want to use Duplex IPTV on multiple devices you need to activate all of them. Why activation is per device? Because each device exhausts server resources such as CPU, traffic and storage. We can't treat a customer with a single device like a customer using 10 devices. The latter puts 10x load on our servers. That is why we activate per device. Do you support Paypal payments? We don't accept direct PayPal payments. Although all payments will be done through Microsoft Windows Store Or Google Play Store. For some countries these stores provide support for Paypal Do you support Payments through website? No, all payments should be done through Duplex IPTV app on Microsoft Windows Store or Google Play Store If I uninstall the app, do I need to activate again after reinstall? No. The reinstall should use the same device ID and Key. If for any reason you get a different device ID or Key please email us both the old and new IDs/Keys in addition to the order receipt received from the store to transfer the activation What are the gift codes? Gift codes are used to activate the app on different type, enter the gift code and then click [Activate Device] Instead of paying real money you can use the gift code to activate the app. You can get gift codes using two methods: For every 10 activations of the same type made by a certain device the system generates 3 free gift codes that you can use to activate the app for any other devices. You can purchase Gift Codes using the app. It is similar to purchase normal activation, but you need to choose [Package] I'm a reseller, how to get my gift codes? First, and the most important step is that you need to login using the ID and Key of the device you are using to activate other devices Open [Gift Codes] and collect the codes. These codes can be used to activate any device Please note that: each gift code can be used only once, so keep it secret How to use the gift codes? You can use gift codes to activate devices through the app or through the website Using gift codes through the app Through tha app, the process is similar to normal activation process Use the app to open the usual renewal form Instead of selecting an activation type, enter the gift code and choose [use gift code] Using gift godes through the website Login to Edit.Duplexiptv.com using the ID and key of the device you are using for payments Click [Gift Codes] on the top menu View your gift codes. The gift codes marked with green color means it is not used yet and you can use it to activate a device Pick one of these codes and then click [Activate Device] Enter the device ID/Key you want to activate then enter the Gift Code and press Activate Have a question? Please read this FAQ before contacting us. If you find the answer here please don't contact us to just validate the answer. For any inquiries please contact us at DuplexIPTV@gmail.com Note: We will not respond to any emails regarding where and how to get playlists and any similar questions.
