The term 'attitudinal' derives from the word 'attitude', which originates from the Latin 'aptitudo', meaning 'fitness, adjustment, or skill'. The modern English usage of 'attitude' began in the late 19th century, mainly through the influence of psychology. It started to gain prominence in social science discussions during the 20th century, acknowledging that attitudes are vital in understanding human behavior and social dynamics. The suffix '-al' is used to form adjectives from nouns, indicating a characteristic or relation. Thus, 'attitudinal' emerged to describe anything related to feelings, beliefs, or orientations that are linked to attitudes, particularly in the context of social behavior and psychology.
